

## **CALL FOR PRESENTATIONS**

The Georgia Oracle Users Group meets monthly and is always looking for presenters.

Typical presentations are:

- Technical Tips, Tricks, Hints for Oracle Developers and DBAs
- Deep Dives on a specific Oracle feature or technology
- Industry Overview, Forecasts, Direction
- Career, Job-Market, Hiring Trends
- Technical discussion on Storage, Servers, Backups, O/S, Tools...

Share your knowledge and expertise with colleagues in the metro Atlanta area.

We encourage group members to present and share their real-world experience working with Oracle technology. Additionally, we welcome vendors and consultants who can share technical knowledge of interest to the group; however, our members have found that “sales” and “services” oriented presentations do not meet their need and desire to increase their hands-on skills.

For more information, please visit our website, or email the group's president: [president@gouser.org](mailto:president@gouser.org)
